Memo

More convenience thanks to new roller carriage runner

Wooden drawers with TANDEM single extensions now have a soft stop action when pulled into the open position due to improvements to the roller carriage runner. This adaptation applies for the locking device version (550H), as well as for the hook and peg version (551H) up to and including a nominal length of 560 mm.

Feather-light glide

TANDEM ensures a feather-light glide and high ease of use thanks to low-friction cylindrical rollers and soft end stop.

Varied programme

The wide range of nominal lengths and a load bearing class of 30 kg provides versatile options.

Enhanced ease of use

TANDEM with or without integrated BLUMOTION, optionally with TIP-ON or even SERVO-DRIVE for handle-less furniture.
